

**Important notice to Spinlock Deckvest owners
for circulation 20th October 2010**

Spinlock Deckvest Update Advice.

- At the beginning of this year, Spinlock took action to redesign the lifejacket inflatable component of the Deckvest, significantly increasing its long term durability. As a result, the owner's warranty on each new Deckvest registered has since been increased from 2 years to 5 years.
- **To eliminate any possibility of future risk to owners of earlier Deckvest models, Spinlock are now committed to recall and update all previous ISO certified Deckvests to the latest 2010 standard, before the start of the 2011 season.**
- **Important Action Required:**
If you own an ISO approved Deckvest (with inspection window) you are advised to enter your Deckvest serial number at www.spinlock.co.uk/update for instructions on the action to be taken.
- If your Deckvest is one of the ISO models that qualify for the update, a designated Deckvest Service Centre will process it completely free of charge.
The lifejacket will be updated to the latest 2010 standard, given a routine winter check and a certificate of the extended 5 year warranty.
- **Deckvest owners are asked to apply for this update without delay and not later than 1st April 2011**
- See www.spinlock.co.uk/update for full information.
